Job Description

Company	Leonardo W.L.L
Designation	Computer Engineer
Department	Engineering
Reporting to	Project Manager / Designated Engineering Manager

Introduction

The Computer Engineer is responsible for providing technical support for the implementation, operation, maintenance, and troubleshooting of computer systems and related technologies.

Responsibilities

- Support the installation, configuration, integration, and maintenance of computer systems and related equipment.
- Configure, monitor, and troubleshoot computer networks, servers, and virtual environments.
- Support database management and related system operations.
- Develop, modify, or support software applications using relevant programming languages, including C++ and Java.
- Work with Linux and Windows Server operating systems.
- Identify and resolve hardware, software, network, and system-related technical issues.
- Perform system testing and verification to ensure reliable operation.
- Maintain technical records, system documentation, and reports related to assigned activities.
- Coordinate with technical teams and relevant personnel to address operational and technical requirements.
- Follow approved technical procedures, company requirements, and applicable information security standards.

Authorities

- Perform assigned technical activities within the approved scope of work and instructions.
- Access and use company systems, equipment, and technical information as authorized.
- Identify technical issues and recommend appropriate solutions to the responsible manager.
- Request technical information and support from relevant departments and personnel.
- Escalate technical issues, system risks, and matters requiring management approval.

Accountabilities

- Proper execution of assigned technical activities.
- Reliability and proper functioning of assigned systems and equipment.
- Timely identification, reporting, and resolution of technical issues.
- Accuracy and completeness of technical records and documentation.
- Compliance with company requirements, technical procedures, and information security standards.
- Effective coordination with technical teams and relevant stakeholders.

Qualifications

- Bachelor's degree in Computer Engineering, Computer Science, Information Technology or a related field.
- Minimum 3 years of relevant experience in computer systems, networking, software development, or technical support.
- Practical knowledge of server operating systems, databases, and virtual environments is an advantage.
- Experience in defence, radar, or other technical project environments is an advantage.

Skills:

- Technical knowledge of computer networking and database management.
- Knowledge of computer programming, particularly C++ and Java with familiarity with HTML.
- Knowledge of virtualization technologies and virtual environments.
- Working knowledge of Linux and Windows Server operating systems.
- Strong problem-solving and troubleshooting skills
- Good interpersonal and communication skills.
- Proactive approach to work and technical problem-solving.
- Adaptability to changing technical requirements.
- Ability to work effectively as part of a technical team.
- Good teamwork and interpersonal skills.
- Good command of Arabic and English; knowledge of Italian is an advantage.

How to Apply

Interested candidates who meet the above requirements are invited to submit their CVs to maricel.mesina@leonardo.com.kw and maricel.mesina@leonardo.com
